

TEC-LOCK™ Wedge Coupled (TLWC) Connection Technology | Semi Premium

Features

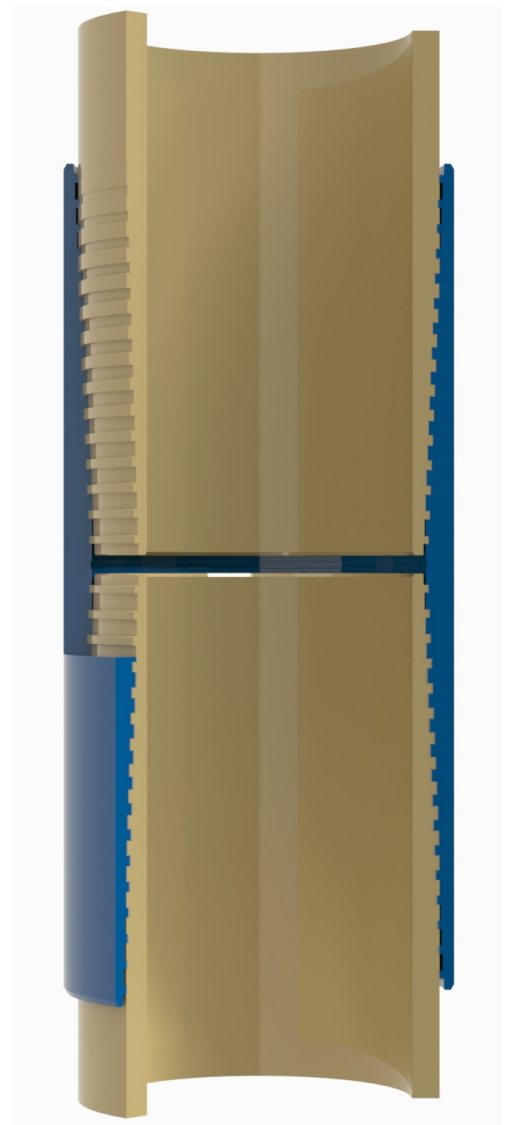

- Available in sizes ranging from 4.5 in. to 7 in.
- Low profile coupling optimizes clearance while minimizing connection stresses
- Internal lush bore eliminates turbulence and tool hang ups
- Wedge-style thread form
- Optimum run-out thread form for 100% axial efficiencies.

Benefits

- Box ODs near that of semi-flush connections for maximized clearance and performance
- Extreme high torque capability
- 100% Tension and Compression efficiencies
- Undercut load and stab flanks ensure outstanding performance under extreme combined loads
- Quick make-up reduces casing run times

TEC-LOCK™ Wedge Coupled is the go to solution for a low profile threaded & coupled product that offers premium performance at a semi-premium price.

When combined with SealLube™ thread sealant, TEC-LOCK™ Wedge Coupled provides gas sealability on a product without a metal to metal seal, offering a cost competitive alternative to premium connections
