

## Products and Services

Hunting provides products and services to the world's leading national, international energy companies and oil service companies enabling the extraction of oil and gas. Manufacturing and sales locations are located in the key energy producing regions of the world.

### Proprietary Technology

Hunting owns and develops proprietary patented products with a full range of applications below the wellhead including mud motors, premium connections, well perforating, logging and intervention tools.

### Geographic Footprint

In strategic locations around the world Hunting owns and operates plants, properties and equipment employing people to serve its global customers with local services and products.

## Global Business Units

Perforating & Logging Systems	Advanced Manufacturing	Electronics
Connection Technology & OCTG	Well Intervention Equipment	Trenchless & MWD
Subsea Technologies	Well Testing	Organic Oil Recovery

## Health, Safety, Environment and Quality Assurance

Hunting is committed to working safely in an environmentally responsible manner. These principles are fully integrated within our Quality Management System that defines the company's global operations.

### Quality Assurance

It is essential that products and services provided by Hunting are designed and manufactured to conform to the agreed API, proprietary licensor, or other specification of the customer, meeting their needs and expectations the first time, every time.

It is the policy of Hunting that only the highest quality products and services, that meet all specification requirements, are provided to customers. Hunting operates a corporate Quality Management System covering all worldwide locations.

### Health, Safety and the Environment

Hunting is committed to achieving and maintaining the highest standards of safety for its employees, customers, suppliers and the public. All Hunting business units consciously operate in a manner that includes environmental matters as an integral part of its business plan.

Hunting's aims are no accidents, no harm to people, and no damage to the environment.

The Hunting goal is "Total Customer Satisfaction".

E-Line Tools  
Mechanical Plant  
Thru-Tubing Technology

## Well Intervention Equipment

[huntingplc.com/products-services/well-intervention-equipment](http://huntingplc.com/products-services/well-intervention-equipment)

The Hunting Well Intervention division provides a range of products and services for downhole intervention use in producing wells to perform logging or other well services.

### Pressure Control Equipment ▼

Hunting provides professionally designed and manufactured surface Pressure Control Equipment to allow clients to perform successful well interventions in the most arduous conditions.

Equipment is manufactured to the most stringent quality standards, comprising of a fully comprehensive range including specialized packages to greatly reduce manual handling and enhance the safety of any wireline intervention.

### Mechanical Plant ▲

Hunting designs and manufactures a comprehensive Mechanical Plant range to complement our Pressure Control Equipment. The range includes:

- Control Panels
- Pressure Testing Equipment
- Shipping Skids
- Containerised Workshops
- Other components and accessories

### ◀ Slickline Tools

Hunting manufactures a full range of Slickline Downhole Tools that include Rope Sockets, Stems, Jars, Running and Pulling Tools. Basic tool string components are produced to the highest quality standards while Running and Pulling Tools are manufactured to the original designs as per OEM agreements with major service companies.

Hunting also provide innovative proprietary tools which include the VariBall™ Roller System, which has allowed clients to perform high angle well interventions in excess of 80° of deviation.

### E-Line Tools

To accompany our extensive slickline capability, Hunting also offers E-Line Tools manufactured both from proprietary design and under license.

Products include Electric Line Rope Sockets, Swivels and Crossover Joints.

### ◀ Thru-Tubing Technology

Hunting is able to offer unique benefits to the Thru-Tubing industry, providing advanced solutions for a wide range of workover and coiled tubing interventions direct to service providers and operators.

Hunting provides a proactive approach, creating well engineered solutions for on and offshore operations. Hunting's success has been built around knowledge of the industry, planning, equipment reliability and its ability to react to meet customer requirements.

The growth of this division by organic means and through acquisition has allowed for the integration of an extensive range of Pressure Control Equipment technologies, Wireline and Slickline Tools, together with intervention expertise into the Hunting portfolio.
