

# Pull Test / Load Test Fixture

## Pressure Control Equipment | Stand Alone Equipment

### Features

- Safe and convenient
- Single kit replaces multiple fixtures
- Robust design ensures longevity in the field
- Multi-functional platform to test different products
  - Ezi-Load Stuffing Boxes
  - Hydraulic Stuffing Boxes
  - Hay Pulleys
  - Open Hole Tool Catchers

### Benefits

- Allows load testing of equipment on-site
- Repeatable and reliable testing ensures equipment readiness
- Compact footprint for easy transport, use and storage

**The Hunting Test Fixture is designed to offer a safe and convenient method of conducting a load or pull testing and can adapt to a large variety of Hunting products.**

The Fixture offers simple and easy to use functionality all in a compact frame with quick set up and change of adapters for different products.

On-Site load or pull testing capabilities eliminate the need to send equipment to distant test facilities, allowing you to maximize operations and lower costs. Use of the fixture allows functional checking of equipment that has been redressed or may be suspected of damage, improving safety for the user.
