

Otis® GU Shear Up Adapter Slickline Downhole Tools

The Otis GU Shear Up Adapter is designed to convert a standard GS, jar down to shear tool, into a GR, jar up to shear tool.

The Otis GU adaptor is installed onto the Otis GS pulling tool. The shear pin is then removed from the Otis GS pulling tool, this allows the shear pin in the GU adaptor to become active. The combined tool is now categorised as an Otis GR pulling tool.

The Otis GR tool is recommended where downward jarring on the sub-surface device is required prior to pulling.

Otis GU shear up adaptors are available to suit all Otis GS sizes of pulling tool.

Contact your local Hunting Sales Representative for further technical details

Hunting GU Adaptors are available with various connections to suit customer requirements
