

Anti Blow-Up Tool

Slickline Downhole Tools

Features

- Single tool for 2 3/8" thru 5 1/2" tubing
- Drag style dogs cannot stick tools
- Spring actuated dogs adjust drag force when tool lift occurs
- Small O.D. tools adapts to most tool string applications

Benefits

- Prevents tool strings from being blown uphole during operations where sudden pressure or fluid surge occurs.

The Hunting Anti Blow-Up Tool is designed to reduce tool string lift when sudden pressure or fluid surges may blow a tool string up the well.

The Anti Blow-Up Tool provides automatic drag force application where more lift creates more drag.

Utilizing drag dogs that will adapt to 2 3/8" thru 5 1/2" tubulars, the Hunting Anti Blow-Up Tool offers a robust design to meet challenging operational requirements.
