

Wireline Crossovers and Lifting Subs

Slickline Downhole Tools

Features

- Slickline and E-Line Crossovers for most applications
- List Subs are certified

Benefits

- Reduced inventory of tools
- Flexibility to adapt tool to tool

Hunting offers a wide range of Wireline Crossovers and Lifting Subs allowing tools with different connection types to be run in the same tool string. This allows for greater use of existing tools in inventory and reduces costs to maintain duplicate tool strings with different connections.

Hunting Crossovers include most industry connection types and sizes as well as specialty connections including Slickline and E-Line connections.

Hunting Lifting Subs include QLS and Sucker Rod type and all are certified. Specialty Lift Subs can be available upon request.

Crossovers can be made up from the following connections with others available upon request:

Sucker Rod, QLS, HQC (Halliburton) connections
Amerada connections
Drain rod connections
1" GO Connection (13/16"-16)
1 3/16"-12 Thread (GO 'A')
1 5/8"-6 Thread (GO 'B')
Schlumberger and Baker E-Line and Slickline
Certified QLS and Sucker Rod Lift Subs
