

Advanced Drift Tool (ADT)

Slickline Tools

Features

- Multiple configurations options
- Junk Baskets offer 360° debris capture coverage

Benefits

- Reduces operational runs
- Well site optimization

The Advanced Drift Tool (ADT) is comprised of several tools combined into one designed to drift, clean, and collect debris samples all in a single run. The ADT can be supplied to be ran in casing sizes 4 1/2" through 9-5/8". The ADT has multiple fluid bypass ports to assist with access into the well and set up options to assist quick reconfiguration options on the well site.
